

Sustainability Software Developer (full time, permanent position)

GreenDelta is an independent sustainability consulting and software company in Berlin, Germany. We provide internationally-leading services that cover all aspects of software and consulting in sustainability.

Our claim is "the art of sustainability consulting". We combine highly professional, skilled, agile software development, preferably but not only in the open source domain, with profound expertise in Life Cycle Assessment, Social Life Cycle Assessment, Life Cycle Costing, data management, and data quality assurance. Our open source software openLCA is used worldwide, by thousands of users. With Nexus, we have created the world's largest space of consistent Life Cycle Assessment data.

To expand our team, we are now looking for an experienced software developer (m/f).

Your tasks:

- Maintenance and development of Java desktop and web applications
- Responsible for the whole software development life cycle

What we expect from you:

- MS in Computer Science or equivalent
- 5+ years of experience in Java with relevant frameworks (e.g. Hibernate/EclipseLink, Jersey);
- solid foundation in object-oriented analysis and design
- experience in client-side web development and relevant frameworks (e.g. React)
- deep and diverse knowledge of full-stack technologies
- experience with Eclipse RCP based applications is a plus
- excellent problem solving skills
- excellent communication skills in English (German is a plus)

We offer:

- You will be able to contribute to solutions which have a high visibility and impact worldwide, which make better tools for sustainability assessment more easily available
- An inspiring, creative work environment with some of the internationally leading experts in the field, within a good, positive team which is used to achieve something
- Flat hierarchies,
- Fair payment, flexible working hours with the possibility to work from home
- A nice office located quite centrally in Berlin
